

S.S. "CALGARY".

Plan of Oertz rudder submitted, in duplicate, by the
Oertz International Streamline Rudder Co.Ltd.

This rudder is similar to that approved in June 1934
for the sister ship "CALUMET", excepting that it is proposed to
flange the main vertical plate, also the bottom closing plate to
the side plates.

It is submitted that provided the arrangements be
carried out as shewn and amended on the plan and to the
satisfaction of the Society's Surveyors, the same will merit
approval.

In view of the thickness of the vertical closing plate
the Surveyors should see that special care is taken with the
flanging of the same to ensure that the ~~structure of the~~ plate
is not damaged in any way in the process of flanging.
