This is to Certify that

B. S. WITOWSKI

*Cape Dreyer*  
the undersigned Surveyor to this Society did at the request of  
The Owners attend on board S.S. "CAPE DREYER" 7123 gross tons of Piraeus on  
February 17, 1961 and subsequent dates, on account of damage stated to have  
been caused by grounding at Hackleberry Island on February 1, 1961.

Following temporary repairs and tests were carried out at this time  
in order to enable the vessel to proceed in tow from Hoboken Yard of the  
Todd Shipyards Corporation, to Jersey City, N.J., for discharge of her  
present cargo of scrap iron:

1. Fractures in bottom shell plating in way of No. 1,2,3 Double Bottom tanks sealed off by means of cement boxes and steel plates welded over. Leaky seams, butts and rivets caulked or welded. Fractured and torn bulkhead between No. 3 hold and boiler room made tight by fitting cement boxes. Bottom plating in way of damage tested on completion of temporary repairs and proven tight.
2. Two independent gasoline driven salvage pumps, capacity 50,000 gallons per hour each placed in No. 2 Tween Deck.
3. Salvage pumps tested and found capable of handling water in spaces forward of boiler room bulkhead.
4. Ship's pumps tested and found capable of handling water in engine room and spaces abaft E.R. after bulkhead.

In my opinion this vessel is fit to be moved within the New York Harbour in order to discharge her present cargo.
