20th August, 1957.

Dear Sirs,

(S)

Motorship "GADILA"

The Society's Surveyors at Singapore have reported that this ship was under survey in June/July, when an examination was carried out in drydock, the Donkey Boiler Survey held and the screwshaft inspected.

The forward water box of the condenser was found to be wasted at this time, and it was recommended that this part should be renewed by the end of July, 1958.

The Committee have continued the class subject to this matter receiving attention by that time.

A record of Drydocking 6,57 and notations of Screwshaft 6,57 and Donkey Boiler Survey 7,57 have been assigned.

Yours faithfully,

c.c. Rot.

pro Clerk to the  
Classification Committee.
