

Enclosures.

14th August, 1948.

Dear Sirs,

S.S. "PAN".

S. I have to acknowledge the receipt of your letter of the 12th instant, enclosing results of shell drillings. These have been examined and compared with the plans approved for a sister vessel and are such as could be approved.

It is concluded the thicknesses of the Poop, Bridge, Forecastle, Bilge and bottom shell plating, which have not been drill tested, will be furnished in due course.

I have to point out that the drilling sheet forwarded by you has not been set out in the proper manner, but it is concluded the particulars amidships and those at the forward end have been transposed.

The plans forwarded by you are returned herewith,

Yours faithfully,

The Surveyors,
BARRY.

Clerk to the
Classification Committee.
