

Enclosure.

2nd March, 1948.

Dear Sir,

S.S. "THALAMUS"

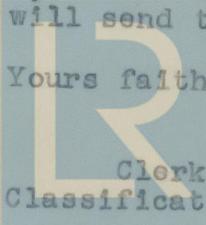

With reference to Liverpool Report No. 126369, it is concluded that in addition to the items enumerated for completion of Special Survey, the ship requires to be cut and strapped, and that in accordance with Circular No. 1871, it does not appear necessary for the forward deep tank and oil fuel bunkers to be examined internally for Special Survey until the vessel is eight years old.

I shall be glad if you will furnish full particulars of the equipment on board as verified from the American Bureau of Shipping test certificates.

The First Entry report is forwarded herewith for the Surveyor's signature, which has been omitted, and I shall be glad if you will send this report back by return.

Yours faithfully,

The Secretary,
LIVERPOOL.

 Clerk to the
Classification Committee.
