Particulars of Classification (which must be inserted precisely as in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be separated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eg) which is to be attached to this Report.

Give dates and references to any letters relating to this Report 'R' 28.7.61

Was a damage report made by anyone else? If so, by whom?

MINATION AND REPAIRS AS PER RULE FOR GENERAL EXAMINATION FOR POSTPONEMENT OF S.S. DUE 6.61

Shell plate 'F' No.3 (psa) in No.5 Hold wasted and cement box fitted.
Now efficiently fitted with plate doubler (E.W.) over affected area externally.

No.2 Hold bilge (ps) noted to have been previously fitted with a cement box for the entire length covering the shell plating. Now specially examined and found efficient and bilge drainage arrangements satisfactory. Externally the plating appears in good condition. The Owners state that a few side shell rivets were weeping.

Sundry minor repairs carried out.

NOTE: The general condition of this ship so far as now seen warrants in my opinion the ship being submitted for Special Survey by not later than end of December 1961.

GENERAL OBSERVATIONS, OPINION AND RECOMMENDATION AS TO CLASS

State clearly what alteration, if any, is suggested to be made in the existing Classification or Survey or other records of the Ship in the Register Book consequent upon this survey; for example:—"to remain as Classed in the Register Book without fresh record of Docking"; "to remain as Classed and to have record of drydocking 1.55"; or "to remain as Classed and to have record of drydocking 1.55, and the notation of S.S. . . . 1.55".

This ship, so far as now surveyed, is eligible in my opinion to remain as classed and to have record of D.S. 9,61 subject to shell plate F.3(psa) being renewed by the Special Survey, to No.2 Hold Bilge (ps) being specially examined by the Special Survey and to the conditions at present attached being dealt with as previously recommended.
