

s.s. "MATHURA".

Convention freeboard certificate expires
31.12.33.

The Glasgow Surveyors wrote on the 15th June last that the S.S.No.3 of this ship was being completed at that port with the exception of the examination of the lower bunkers, testing of No.4 double bottom tank and the making good of the cargo battens, and it was understood that this would be attended to on the vessel's return to London before the end of this year. The Surveyors added that as the vessel had been laid up since the freeboard was verified, it was not considered necessary to verify the freeboard and hold a Renewal Survey.

The Special Survey as regards the hull was completed in London on the 12th September, but the Surveyor (Mr. C.W. Reed) did not report upon the freeboard and consequently fresh certificates were not issued.

When the machinery survey is completed the vessel will receive the notation of S.S. No.3-4,33.
