Last Report: No. **505** Port **Bah** Particulars of Classification (which must be inserted precisely as in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be separated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eq) which is to be attached to this Report.

Give dates and references to any letters relating to this Report

EXAMINATION AND REPAIRS AS PER RULE FOR **Condition of class (see Bahrain Certificate issued 1st August, 1962).**

NOW DONE:- Examined cement boxes in No. 5 hold port side and in boiler room starboard side and found to continue efficient.

It was recommended that the crack in shell plating 2nd below sheer between frames 23 & 24 (p.s.) in No. 5 hold, and hole in shell plating 3rd below sheer (s.s.) in boiler room being specially examined and dealt with as necessary on arrival at Piraeus where the ship is now proceeding in ballast condition.

GENERAL OBSERVATIONS, OPINION AND RECOMMENDATION AS TO CLASS

State clearly what alteration, if any, is suggested to be made in the existing Classification or Survey or other records of the Ship in the Register Book consequent upon this survey; for example:—"to remain as Classed in the Register Book without fresh record of Docking"; "to remain as Classed and to have record of drydocking 1.55"; or "to remain as Classed and to have record of drydocking 1.55, and the notation of S.S. . . . 1.55".

This ship where now surveyed is in efficient condition and eligible in my opinion to remain as now classed without fresh record of survey, subject to crack in shell plating 2nd below sheer between frames 23 & 24 (p.s.) in No. 5 hold, and hole in shell plating 3rd below sheer (s.s.) in boiler room being specially examined and dealt with as necessary on arrival at Piraeus where the ship is now proceeding in ballast condition. Also subject to all other conditions at present attached to the ship's class being dealt with as previously recommended.
