

Tanker "CONSTANCE"

Mr. Jensen has telephoned from Gothenburg that the Owners have the opportunity to run this ship on one more voyage before she is sent to Japan to be broken up.

The Committee have already agreed to an extension of one month beyond the year of grace, but now the Owners request that class may be maintained until December next.

They are quite prepared to carry out another Load Line Survey before the end of November.

It is understood from Mr. Jensen that the Load Line Survey previously required has already been held at Chittagong with satisfactory results.

10/11/62
No technical objection provided ship is found or placed in satisfactory condition at load 16th October, 1962 before the end of November.
