

Memorandum

m.v. "PAUA".

No.81237 in the Register Book.

Built 1927 - 6 months, by Messrs.Harland & Wolff Ltd.

Mr. Youldon, an Assistant Superintendent to The Anglo Saxon Petroleum Co. Ltd., called at this Office today and discussed a proposal to fit supercharging arrangements to the engines of the above vessel, increasing the mean indicated pressure to 8.5 Kgs. per sq. cm. and the B.H.P. to 1050 at 140 r.p.m.

The sizes of shafting have been examined for the proposed conditions and found to be satisfactory.

Mr. Youldon requested to be advised, by telephone, of the result of the above examination and has been advised accordingly.
