1 - MAR 1948

Lloyd's Register of Shipping.

Port A D E N,

30th. January 1948.

This is to Certify that

C. Buchan,

signed Surveyor to this Society did at the request of Lloyd's Agents and on the demand of the Anglo Iranian Oil Co. on behalf of Captain L.R. Morrison, Master of the single tanker "FRANCINE CLORE" 10,448 tons gross of London, survey the starboard boiler on 9th. January 1948 and subsequent consequence of vessel arriving in this port with that boiler in condition.

The Chief Engineer stated that at 8-15 a.m. on 7th. January starboard boiler was shut down owing to leaking tubes and vessel in Aden on port boiler.

On examination of the starboard boiler on 9th. January I found 5, 6 and 12 tubes in the back row (numbering from outboard) Nos. 2, 20, 22 and 23 in fire row holed and Nos. 2 and 4 in the water wall holed. I recommended that these tubes be plugged and boiler be tested by hydraulic pressure. Again visiting this vessel on 10th. January I saw a test on the starboard boiler which was satisfactory and I then recommended that faulty tubes be cut out and spare tubes on board be fitted. Again visiting this vessel on 11th. January after port boiler had been taken off steam I found one tube in the back row split, 2 tubes in side wall split and 3 tubes blistered in the fire row; as there weren't sufficient tubes on board I recommended that 5 tubes be flown out as soon as possible. Again visiting this vessel on 24th. January I found that ample tubes had been flown out and recommended that all faulty tubes be removed and that new tubes be fitted. Again visiting this vessel on 29th. January I saw a hydraulic test on the starboard boiler which was satisfactory and a test on the port boiler on 30th. January which was satisfactory.

This vessel's boilers are now in good condition and I recommend that vessel proceed on her voyage to the U.K. remaining in her present class (class contemplated) in the Register Book without fresh survey.

Fee £18-18-0.

C. Buchan
Surveyor to Lloyd's Register
of Shipping.

This is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

The Committees of the Society use their best endeavours to ensure that the functions of the Society are properly understood that neither the Society nor any Member of any of its Committees is under any circumstances responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any Book or other publication of the Society, or for any error of judgment, default or negligence of any of its Members thereof, or the Surveyors, or other Officers or Agents of the Society."
