**GENERAL REMARKS** (State quality of workmanship, opinions as to class, &c.) These boilers, constructed under Special Survey (See Seattle Blr. Reports Nos. 3444, 3445, 3446 attached hereto) have now been fitted on board the vessel in accordance with the approved plans and the requirements of the Rules. The safety valves were adjusted under steam to 220 lbs. per sq. inch. The boilers were tried under working conditions with good results and in our opinion, are now in a good and safe condition.
