Telex No.: 24305

21st December, 1962.

Dear Sirs,

S.S. "KUALA TRENGGANU"

I acknowledge receipt of your letter of the 20th November, the contents of which have been noted.

In order to complete the General Examination for postponement of the Special Survey until March 1963 the peak tanks require to be examined and found satisfactory, and I shall be glad if you will ascertain from the Owners, for the information of the Committee, what early arrangements can be made for this matter to receive attention.

If a further deferment beyond March next is subsequently desired by the Owners a few spaces of the water ballast tanks immediately forward and aft of the machinery space will also require to be generally examined.

With regard to the Main Boiler Survey the port boiler on the fire side together with all mountings, the centre and starboard boilers and the oil burning system and remote controls require to be examined, and all boiler safety valves adjusted to complete the survey.

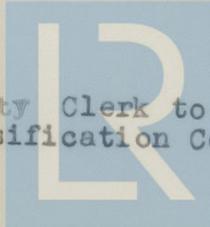

At the survey carried out at Shimonoseki in October it was stated that the Boiler Survey would be completed during December, and it is concluded the necessary arrangements have been made to deal with this matter.

Yours faithfully,

Deputy Clerk to the
Classification Committee.

The Surveyors,
KOBE
