

MEMORANDUM

M.T. "SVEABORG"

Shipbuilders: Messrs. Kockums Mek Verkstads Yard No. 263

Since the Gothenburg certificate dated 4.11.43 certifying the economiser to be suitable for a working pressure of 7 kg.cm² has not been superseded by a further certificate confirming that the recommendations contained in the Secretary's letter of 13.1.44 had been carried out, it must be concluded that the economiser is suitable only for a working pressure of 7 kg.cm.².

The above conclusion appears to be confirmed by Malmo certificate dated 20.4.44.

Suitable arrangements, however, have been provided to safeguard the economiser as shown in the attached photostat copy of a diagrammatic sketch taken from plan No. S.10334.

In the circumstances it is considered that the vessel should receive the notation in the Register Book of D.B.S. 171 lbs. per sq. inch and no reference need be made to the working pressure of the economiser.
