

"STANVAC NAIROBI"

In view of the deck and bottom shell deterioration, it was decided the owner should be strongly recommended to carry out the Special Survey (due 9,61) at the earliest possible opportunity.

A request has now been received from the Owners that the ship be allowed to make one more voyage from the Persian Gulf to Hong Kong, which it is noted is in the summer zone.

The tank length ratio divided by C_b , which is .84 is above that which would normally be required and in addition there is a midship pump room and this would therefore give a smaller stress in the loaded condition.

IT IS SUBMITTED the Owners be informed that it will be in order for the proposed voyage from the Persian Gulf to Hong Kong to take place.
