LLOYD'S REGISTER OF SHIPPING

Port of Stockholm,

28th January, 1958.

This is to Certify that I have

Surveyed the steel single screw steamer "RUNMARÖ", 2887 tons gross of Stockholm, on the 27th and 28th December, 1957, whilst the vessel was lying on slipway at Oskarshamn, for Docking and General Examination with a view of Postponement of Class,

and that I will transmit to the Committee of Lloyd's Register of Shipping, London, a Report, stating that all repairs recommended by me have been completed to my satisfaction, also that I will

Recommend that she be continued as now classed (viz. +100A1) with fresh record of Docking Survey 12.57, subject to the General Examination being completed, the recommended repairs being carried out and the forecastle shell plating etc. (port side) being dealt with before the vessel be placed in service (now laid up at Oskarshamn) and to all other conditions at present attached to the vessel's class being dealt with as previously recommended, she

being fit to carry her usual cargoes.

To complete the General Examination, the steering gear, hatch covers in place and Nos. 2 and 5 D.B. tanks in the vicinity of the machinery be examined and following repairs carried out: 60 frames in holds to be partly renewed, shell plates Nos. C 2 and D 18 (port and starboard) be renewed and tunnel and A.P. tank top plating be repaired.

I.W. Lager
I.W. Lager.

Surveyor to Lloyd's Register.
