

16th October, 1961.

25 - As recommended.

RMC 15024 - As recommended.

"SVEND MAERSK" - As recommended. According to the Capacity Plan of this ship, the deep tank at the after end of No. 3 hold is not divided transversely into two separate tanks (port and starboard), I shall be glad if you will forward your comments on this point.

"DUMRA" - As recommended and subject as previously recorded.

"BHARATRAJA" - As a result of a survey held at Calcutta last year, the class of this ship has been made subject, inter alia, to the anchor being supplied at the earliest opportunity. It is, however, from your memorandum of the 29th September, that the company are seriously considering disposing of this ship for scrap. I shall be glad to learn if you have any further information regarding this matter.
