

# Lloyd's Register of Shipping,

97 & 98, Scottish Provident Buildings,  
Donegall Square West,

Belfast, 20th April, 1927.

The Secretary,  
LONDON.

Dear Sir,

With reference to the notations of class of the M.V. "PORT FREMANTLE", I have to point out that the Donkey Boiler as fitted is intended to be worked at 100 lbs. per square inch, and not 125 as stated in the classing letter of the 12th instant.

This boiler was constructed for a working pressure of 125 lbs, but was substituted for the one intended to be fitted in the "PORT FREMANTLE" on account of the delay in obtaining the <sup>material</sup> for the construction of the latter boiler.

I am, Dear Sir,

Yours faithfully,

*R. Lee - Jones*

Lloyd's Register  
Foundation

003549-003555-0117

Referred to the Chief Engineer Surveyor

7AM

21 APR 1947  
Also for Mr. S. A. Hill to note!

It is submitted the Belfast Surveyor be informed that as the donkey boiler was constructed for a working pressure of 125 pounds the vessel is entitled to this pressure being recorded in the Reg Book, unless the Owners otherwise desire.
