REIVEL ON STEAM REOUI ROUATING ENGINE MAUNITERIA.
Date of writing Report 14 may 1930 When handed in at Local Office 12 may 1930 Port of Southam bein
No. in Survey held at Cowes Date, First Survey 3 July 1930 Last Survey 8 2 1930 Reg. Book.
40889 on the Gaddle Lory Stances JOHN BENN Tons Ret
Built at Covers By whom built Samuel Whate Asta No. 1685 When built 1930
Engines made at do By whom made do Engine No. 1685 when made 1930
Boilers made at By whom made Boiler No. 1685 when made 1930
Registered Horse Power Owners Lendon County Connact Port belonging to Lendon
Nom. Horse Power as per Rule /70 Is Refrigerating Machinery fitted for cargo purposes Is Electric Light fitted yes Trade for which Vessel is intended R. Zauces Lang at Worland
Dia. of Cylinders 33" Length of Stroke 34" No. of Culinders 4 (2000) No. of Cranks 2 (2000)
Crank shaft, dia, of journals as per Rule affin Chank pin dia. Q 1/4 Crank webs Mid. length breadth Thickness parallel to axis.
Intermediate Shafts, diameter as sitted. And length thickness
as paren
Tube Shafts, diameter as per Rule as per Rule as fitted with a continuous liner as fitted as per Rule as per Rule as per Rule as per Rule
Bronze Liners, thickness in way of bushes as fitted
If the liner is in more than one length are the junctions made by fusion through the whole thickness of the liner If the liner does not fit tightly at the part between the bearings in the stern tube, is the space charged with a plastic material insoluble in water and non-corrosive
If two liners are fitted, is the shaft lapped or protected between the liners Is an approved Oil Gland or other appliance fitted at the after end of the tube
Shaft If so, state type Length of Bearing in Stern Bush next to and supporting propeller 1'-8" Propeller, dia. 1'-8" Pitch No. of Blades Material whether Moveable Total Developed Surface sq. feet
Feed Pumps worked from the Main Engines, No. Diameter Stroke Can one be overhauled while the other is at work
Bilge Pumps worked from the Main Engines, No. — Diameter — Stroke — Can one be overhauled while the other is at work — Freed (No. and size 1, 7454/2); / 54546
Pumps How driven Main Bilge Line No. and size TX 5 X 5 S X 5 X 6 How driven States
Ballast Pumps, No. and size Lubricating Oil Pumps, including Spare Pump, No. and size Are two independent means arranged for circulating water through the Oil Cooler Suctions, connected to both Main Bilge Pumps and Aurilians
Bilge Pumps;—In Engine and Boiler Room & 2 2 "V
In Holds, &c. 2" in 'cach compattuent,
Main Water Circulating Pump Direct Bilge Suctions, No. and size 2 9 # Independent Power Pump Direct Suctions to the Engine Room Bilges.
Main Water Circulating Pump Direct Bilge Suctions, No. and size 2 9 4 Independent Power Pump Direct Suctions to the Engine Room Bilges, No. and size Are all the Bilge Suction Pipes in holde and tunnel well fitted with strum-boxes
No. and size Are all the Bilge Suction Pipes in holde and towned with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight fail pipes to the bilges some only
Are all the Bilge Suction Pipes in holds and tunnel well fitted with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible mul-boxes, placed above the level of the working floor, with straight lail pipes to the bilges Are they fitted with Valves or Cocks Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates Are the Overboard Discharges above or below the deep water line
Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight fail pipes to the bilges Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight fail pipes to the bilges Are they fitted with Valves or Cocks Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates Are they each fitted with a Discharge Valve always accessible on the plating of the vessel Are the Blow Off Cocks fitted with a spigot and brass covering plate
Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges some all fare they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are they each fitted with a Discharge Valve always accessible on the plating of the vessel. What Pipes pass through the bunkers. Are all the Bilge Suction Pipes in holds and tennel well fitted with strum-boxes. Are they level of the working floor, with straight tail pipes to the bilges some of the b
Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges Are they fitted with Valves or Cocks Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates Are they each fitted with a Discharge Valve always accessible on the plating of the vessel What Pipes pass through the bunkers How are they protected What Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times
Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges some all fare they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are they each fitted with a Discharge Valve always accessible on the plating of the vessel. What Pipes pass through the bunkers. Are all the Bilge Suction Pipes in holds and tennel well fitted with strum-boxes. Are they level of the working floor, with straight tail pipes to the bilges some of the b
Are all the Bilge Suction Pipes in holde and townel well fitted with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight lail pipes to the bilges Lower stage. Are all Sea Connections fitted direct on the skin of the ship. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are they off Cocks fitted with a Spiyot and brass covering plate. What Pipes pass through the bunkers. What pipes pass through the deep tanks. Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times. Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another. Is the Shaft Tunnel watertight. Is it fitted with a watertight door worked from
Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges 1000 of the skin o
Are all the Bilge Suction Pipes in holds and tunnel well fitted with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight aid pipes to the bilges Are the Bilge Suctions fitted direct on the skin of the ship. Are they fitted with Valves or Cocks Are they fixed sufficiently high on the skip's side to be seen without lifting the stokehold plates Are they each fitted with a Discharge Valve always accessible on the plating of the vessel What Pipes pass through the bunkers What Pipes pass through the deep lanks Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all botter mountings accessible at all times Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tenks into the cargo or machinery spaces, or from one compartment to another Is the Shaft Tunnel watertight Is it fitted with a watertight door Working Pressure Solla a REPORT ON MAIN BOILERS NOW FORWARDED? Working Pressure Solla a Source of Boilers Are the Valves or Cocks Are the Overboard Discharge to the bilges Are the Overboard Discharges above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Discharge above or below the deep water line Are they fitted with a Di
Are all the Bilge Suction Pipes in holds and tennel well fitted with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight fail pipes to the bilges Lottes and the Bilge Suctions in the Machinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight fail pipes to the bilges Lottes and the strip. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates for the Overboard Discharges above or below the deep water line. Are they each fitted with a Discharge Valve always accessible on the plating of the vessel. What Pipes pass through the bunkers. How are they protected. What pipes pass through the deep tanks. Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times. Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another. Is the Shaft Tunnel watertight. Is it filted with a watertight door. WAIN BOILERS, &c.—(Letter for record. 2) Total Heating Surface of Boilers. No. and Description of Boilers. No. and Description of Boilers. AREPORT ON MAIN BOILERS NOW FORWARDED? IS A DONKEY BOILER FITTED?
No. and size Are the Bilge Suctions in the Mackinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight aid pipes to the bilges are all Sea Connections fitted direct on the skin of the skip. Are they fixed sufficiently high on the skip's side to be seen without lifting the stokehold plates Are they fixed sufficiently high on the skip's side to be seen without lifting the stokehold plates Are they give in the Bilge Suctions in the Mackinery Space led from easily accessible on the skip of the vessel Are they fitted with Valves or Cocks Are they fitted with Valves or Cocks Are they fitted with Valves or Cocks Are they fitted with a Discharge valve always accessible on the plating of the vessel Are they protected with a Discharge valve always accessible on the plating of the vessel What pipes pass through the bunkers What pipes pass through the deep tanks Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountains accessible at all times Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another Is the Shaft Tunnel waterlight Is it filted with a waterlight door WAIN BOILERS, &c.—(Letter for record &) Total Heating Surface of Boilers Is Forced Draft fitted No. and Description of Boilers Are approved plans forwarded hereful for Shafting Main Boilers Main Boilers Donkey Boilers Donkey Boilers
No. and size Are the Bilge Suctions in the Machinery Space ted from asily accessible mud-boxes, placed above the level of the working floor, with straight and pipes to the bilges Note only Are all Sea Connections filled direct on the skin of the
No. and size Are the Bilge Suctions in the Mackinery Space led from easily accessible mud-boxes, placed above the level of the working floor, with straight aid pipes to the bilges are all Sea Connections fitted direct on the skin of the skip. Are they fixed sufficiently high on the skip's side to be seen without lifting the stokehold plates Are they fixed sufficiently high on the skip's side to be seen without lifting the stokehold plates Are they give in the Bilge Suctions in the Mackinery Space led from easily accessible on the skip of the vessel Are they fitted with Valves or Cocks Are they fitted with Valves or Cocks Are they fitted with Valves or Cocks Are they fitted with a Discharge valve always accessible on the plating of the vessel Are they protected with a Discharge valve always accessible on the plating of the vessel What pipes pass through the bunkers What pipes pass through the deep tanks Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountains accessible at all times Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another Is the Shaft Tunnel waterlight Is it filted with a waterlight door WAIN BOILERS, &c.—(Letter for record &) Total Heating Surface of Boilers Is Forced Draft fitted No. and Description of Boilers Are approved plans forwarded hereful for Shafting Main Boilers Main Boilers Donkey Boilers Donkey Boilers
No. and size Are the Bilge Suction Pipes in holde and towned well fitted with strum-boxes Are the Bilge Suctions in the Machinery Space led from easily accessible much-boxes, placed above the level of the working floor, with straight will pipes to the bilges to the ships. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates for the Blow Off Cocks fitted with a Discharge Valve always accessible on the plating of the vessel fixed with a Discharge Valve always accessible on the plating of the vessel fixed with a Discharge Valve always accessible on the plating of the vessel fixed with a Discharge Valve always accessible on the plating of the vessel fixed with a Discharge Valve always accessible on the plating of the vessel fixed with a binders. What pipes pass through the binders Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all botter mountings accessible at all times. Is the arrangement of Valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another. Is the Shaft Tunnel watertight. Is it fitted with a watertight door wearked from MAIN BOILERS, &c.—(Letter for record 2) Total Heating Surface of Boilers Is A REPORT ON MAIN BOILERS NOW FORWARDED? Is A REPORT ON MAIN BOILERS NOW FORWARDED? Is a REPORT ON MAIN BOILERS NOW FORWARDED? If so, is a report now forwarded? PLANS, Are beproved plans forwarded her beint for Shafting Main Boilers General Pumping Arrangements Oil fuel Burning Piping Arrangements Oil fuel Burning Piping Arrangements
Are all the Bilge Suctions in the Machinery Space tell from easily accessible mul-boxes, placed above the level of the winter of the strip of the skin of the ship said to the skin of the ship said to the skin of the ship said to be seen without lifting the stokehold plates of the fleely filled with valves or Cocks. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates of the fleely filled with a Discharge above or below the deep water line. Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates. Are the Overboard Discharges above or below the deep water line. Are they been tested with a Discharge valve always accessible on the plating of the vessel. Are the Blow Off Cocks fitted with a spigol and brass covering plate. What Pipes pass through the binkers. What Pipes pass through the deep lanks. Have they been tested as per Rule. Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all botter mountings accessible at all times. Is the arrangement of Valves and their cophections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another. MAIN BOILERS, &c.—(Letter for record 2) Total Heating Surface of Boilers. 2620 ## Is Forced Draft fitted. We No. and Description of Boilers. 2 General Types Working Pressure Sollifa. Is A REPORT ON MAIN BOILERS NOW FORWARDED? If so, is a report now forwarded? PLANS. Are opproved plans forwarded her which for Shafting. It was a surface of footers. General Pumping Arrangements. Superheaters. General Pumping Arrangements. Oil fuel Burning Piping Arrangements. Superheaters. Oil fuel Burning Piping Arrangements.
No. and size Are the Bilge Suctions in the Machinery Space ted from easily accessible mul-boxes, placed above the level of the working floor, with straight fall pipes to the bilges Are all Sea Connections filled direct on the skin of the ship. Are they fleet with valves or Cacks Are they filed with a Discharge valve always agessible on the plating of the vessel Are they filed with a Discharge Valve always agessible on the plating of the vessel What Dipos pass through the deep tanks Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times The arrangement of Valves and their connections such as to prevent the possibility of water passing from water walks into the cargo or machinery spaces, or from one compartment to another Is the Shaft Tunnel watertight Is if filled with a watertight door WAIN BOILERS, Sc.—(Letter for record 2) Total Heating Surface of Boilers Is Forced Draft fitted No. and Description of Boilers Is A REPORT ON MAIN BOILERS NOW FORWARDED? Is A REPORT ON MAIN BOILERS NOW FORWARDED? Is A REPORT ON MAIN BOILERS NOW FORWARDED? If so, is a report now forwarded? PLANS, Are deproved plans forwarded hor with for Shafting Main Boilers Oil fuel Burning Piping Arrangements Superheaters General Pumping Arrangements Oil fuel Burning Piping Arrangements PARE GEAR. State the articles supplied:— Comparison of the working floor of the water of the working floor of the water of the working floor of the water of the pipes of the working floor of the w
