

# REPORT ON ELECTRICAL EQUIPMENT.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

Received at London Office

28 FEB 1947

Date of writing Report... 27-1-1947 When handed in at Local Office... 12-2-47 Port of... BELFAST.

No. in Survey held at... Belfast Date, First Survey... Nov 4<sup>th</sup> '46 Last Survey... 6-2-1947  
Reg. Book. (Number of Visits... 15...)

87892 on the... M.V. "LEPTON" Tons {Gross... 6220  
Net... 3600

Built at... Belfast By whom built... Harland & Wolff Ltd Yard No... 1346 When built... 1946-7

Owners... Anglo Saxon Petroleum Co. Ltd Port belonging to... London

Electrical Installation fitted by... Harland & Wolff Ltd Contract No... 1346 When fitted... 1946

Is vessel fitted for carrying Petroleum in bulk... Yes Is vessel equipped with D.F... Yes E.S.D... Yes Gy.C... Yes Sub.Sig... No

Have plans been submitted and approved... Yes System of Distribution... Two Wire Voltage of supply for Lighting... 110

Heating... Power... 110 Direct or Alternating Current, Lighting... Direct Power... Direct If Alternating Current state periodicity... Prime Movers,

has the governing been tested and found as per Rule when full load is suddenly thrown on and off... Yes Are turbine emergency governors fitted with a

trip switch as per Rule... No Generators, are they compound wound... Yes, are they level compounded under working conditions... Yes

if not compound wound state distance between generators... and from switchboard... Where more than one generator is fitted are they

arranged to run in parallel... No, are shunt field regulators provided... Yes Is the compound winding connected to the negative or positive pole

Negative Have machines over 100 kw. been inspected by the Surveyors during manufacture and testing... None Have certificates of

test for machines under 100 kw. been supplied... Yes and the results found as per rule... Yes Are the lubricating arrangements and the construction

of the generators as per rule... Yes Position of Generators... Motor Room Tank Top Starboard

is the ventilation in way of generators satisfactory... Yes are they clear of inflammable material... Yes, if situated

near unprotected combustible material state distance from same horizontally... and vertically... are the generators protected from mechanical

injury and damage from water, steam and oil... Yes, are the bedplates and frames earthed... Yes and the prime movers and generators in metallic

contact... Yes Switchboards, where are main switchboards placed... Motor Room Platform Starboard

are they in accessible positions, free from inflammable gases and acid fumes... Yes, are they protected from mechanical injury and damage from water, steam

and oil... Yes, if situated near unprotected combustible material state distance from same horizontally... and vertically... what insulation

material is used for the panels... Sindampo (Black) if of synthetic insulating material is it an Approved Type... Yes, if of

semi-insulating material (slate or marble) are all conducting parts insulated therefrom as per Rule... Is the frame effectually earthed... Yes

Is the construction as per Rule... Yes, including accessibility of parts... Yes, absence of fuses on the back of the board... Yes, individual fuses

to pilot and earth lamps, voltmeters, etc... Yes, locking of screws and nuts... Yes, labelling of apparatus and fuses... Yes, fuses on the "dead"

side of switches... Yes Description of Main Switchgear for each generator and arrangement of equaliser switches...

300 Amp. Double Pole Change Over Switches with 300 Amp. Fuses on each Pole

and for each outgoing circuit... Double Pole Change Over Switches with Fuse on each Pole

Are compartments containing switchboards composed of fire-resisting material or lined as per Rule... Yes Instruments on main switchboard... 2

ammeters... 2 voltmeters... synchronising devices. For compound machines in parallel is the ammeter connected on the pole opposite to the

equaliser connection... Earth Testing, state means provided... 2 Lamp System with 2 way D.P. Selector Switch

Switches, Circuit Breakers and Fuses, are they as per Rule... Yes, are the fuses an approved type... Yes, are all fuses labelled as

per Rule... Yes If circuit breakers are provided for the generators, at what overload current did they open when tested... are the reversed current

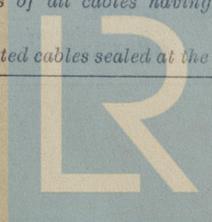

protection devices connected on the pole opposite to the equaliser connection... have they been tested under working conditions, and at what current

did they operate... Joint Boxes, Section Boards and Distribution Boards, is the construction and position as per Rule... Yes

Cables, are they insulated and protected as per the appropriate Tables of the Rules... Yes, if otherwise than as per Rule are they of an approved type...

state maximum fall of pressure between bus bars and any point under maximum load... 4.6 V, are the ends of all cables having a sectional area of 0.04

square inch and above provided with soldering sockets... Yes Are paper insulated and varnished cambric insulated cables sealed at the ends... None

with insulating compound or waterproof insulating tape. Are all the cable runs in accessible positions, not exposed to drip or accumulation

of water or oil, high temperatures or risk of mechanical damage. Yes, are cables laid under machines or floorplates. Yes, if so, are they adequately

protected. Yes Are cables in machinery spaces, galleys, laundries, etc., lead covered to Pyrotex or run in conduit. State how the cables are

supported and protected. Main Runs (Pyrotex) in inverted M.S. Channels under Gangways

Machinery Spaces (Pyrotex) on Perforated Metal Plating

Lighting cables (Lead covered) clipped to Bulkheads

Are all lead sheaths, armoring and conduits effectually bonded and earthed. Yes Refrigerated chambers, are the cables and fittings as per Rule. Yes

Are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands. Yes, where unarmoured cables pass through

beams, etc., are the holes effectively bushed. Yes and with what material. Lead Bushes Alternative Lighting, are

the groups of lights in the engine and boiler rooms arranged as per Rule. Yes Emergency Supply, state position.

and method of control.

Navigation Lamps, are they separately wired. Yes controlled by separate

double pole switches. Yes and fuses. Yes Are the switches and fuses in a position accessible only to the officers on watch. Yes, is an

automatic indicator fitted. Yes Secondary Batteries, are they constructed and fitted as per Rule. Yes, are they adequately ventilated.

what is the battery capacity in ampere hours.

Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, weatherproof. Yes Are fittings

installed where readily combustible materials or inflammable or explosive dust or gases are likely to be present. Yes, if so, how are they protected.

Flameproof Fittings

and where are the controlling switches fitted. Non-Dangerous Positions, are all fittings suitably ventilated. Yes

are all fittings and accessories constructed and installed as per Rule. Yes Searchlight Lamps, No. of 1, whether fixed or portable. Portable

, are their fittings as per Rule. Yes Heating and Cooking, is the general construction as per Rule.

are the frames effectually earthed. Yes, are heaters in the accommodation of the convection type. Yes Motors, are all motors constructed and

installed as per Rule. Yes and placed in well-ventilated compartments in which inflammable gases cannot accumulate and free from damage from water,

steam and oil. Yes, if situated near unprotected combustible material state minimum distance from same horizontally. Yes and vertically. Yes Are

motors coupled to oil fuel transfer and unit pressure pumps capable of being stopped from a position accessible in the event of fire in the pump compartment.

Have motors of 100 BHP and over been inspected by the Surveyors during manufacture and testing. Yes Have certificates of test for motors under

100 BHP intended for essential services been supplied and the results found as per Rule. Yes Control Gear and Resistances, are they constructed and

fitted as per Rule. Yes Lightning Conductors, where required are they fitted as per Rule. Yes Ships carrying Oil having a Flash Point

less than 150° F. Have all the special requirements of the Rules for such ships been complied with. Yes, are all fuses of the cartridge type. Yes

are they of an approved type. Yes Are the fittings for pump rooms, 'tween deck spaces, etc., in accordance with the special requirements for such

ships. Yes Are the cables lead covered as per Rule. Pyrotex Spare Gear, if the vessel is for open sea service have spares been provided as per

Rule. Yes, are they suitably stored in dry situations. Yes Insulation Tests, has the insulation resistance of all circuits and apparatus been tested

and found satisfactory. Yes

PARTICULARS OF GENERATING PLANT.

DESCRIPTION OF GENERATOR.	No. of	RATED AT				Revs. per Min.	DRIVEN BY		WHERE DRIVEN BY AN INTERNAL COMBUSTION ENGINE.	
		Kilowatts.	Volts.	Ampères.			Fuel Used.	Flash Point of Fuel.

The Electrical Equipment is installed in accordance with the approved plans and the requirements of the Rules.  
 All Insulated Conductors are guaranteed to have been tested at the maker's works as specified in the Rules.  
 The foregoing is a correct description.

Electrical Engineers.

Date Feb. 10th 1947.

COMPASSES.

Minimum distance between electric generators or motors and standard compass..... 25 feet

Minimum distance between electric generators or motors and steering compass..... 20 feet

The nearest cables to the compasses are as follows:—

A cable carrying 0.16 Ampères on feet from standard compass 10 feet from steering compass.

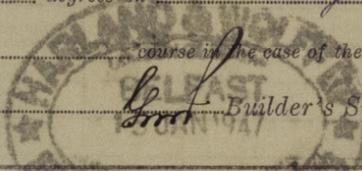

A cable carrying 0.16 Ampères 10 feet from standard compass on feet from steering compass.

A cable carrying 40 Ampères 8 feet from standard compass 8 feet from steering compass.

Have the compasses been adjusted with and without the electric installation at work at full power..... Yes

Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted..... Yes

The maximum deviation due to electric currents was found to be Nil degrees on Any course in the case of the standard compass, and Nil degrees on Any course in the case of the steering compass.

Builder's Signature.

Date 10. 2. 47

Is this installation a duplicate of a previous case..... Yes If so, state name of vessel M.V. "Lyria" + "Lunga"

Plans. Are approved plans forwarded herewith..... No If not, state date of approval 6th February 1946

Certificates. Are certificates of test for motors engaged on essential services and generators forwarded herewith..... Yes

General Remarks (State quality of workmanship, whether insulation tests, etc., have been made, opinions as to class, etc.) The electrical

equipment of this vessel has been fitted on board under special survey tested under full working conditions and found satisfactory materials and workmanship are good.

Total Capacity of Generators..... 60 Kilowatts.

The amount of Fee ... £ 36 : - : When applied for, 27/2/1947

Travelling Expenses (if any) £ - : - : When received, 19.....

R. J. Murchison.

Surveyor to Lloyd's Register of Shipping.

Committee's Minute..... 21 MAR 1947

Assigned..... See F.E. mchly rpt

5m.4.33.—Transfer. (MADE AND PRINTED IN ENGLAND.) (The Surveyors are requested not to write on or below the space for Committee's Minute.)
