

*Urgent: cable*

Motor Vessel "LEONE"

No. 25688 in the Register Book.

built by Messrs. Stabilimento Tecnico Triestino, No.743.

-----

It is stated that the Owners desire to instal four additional air receivers which have been made by Messrs. Tosi, Legnano of material which has not been tested by this Society's Surveyors.

As the matter is urgent, the Leghorn Surveyor desires to be informed by wire as to what action he should take .

It is submitted the Leghorn Surveyor should be informed that the four additional air receivers made by Messrs. Tosi, Legnano, might be accepted provided their scantlings be in accordance with the requirements of the Rules, neither oxy-acetylene nor electric welding has been employed in their construction and the receivers be satisfactory when tested by hydraulic pressure.

The Trieste Surveyors should also be advised.
