Continuous Machinery Survey

COPY/JGC.

m. v. "ONDINA"

8th July, 1944.

The Manager, Technical Division,  
c/o Messrs. The Anglo-Saxon Petroleum Co., Ltd.,  
St. Helen's Court - Leadenhall Street,  
London E.C.3.

Dear Sir,

In reply to your letter of the 22nd June I am sending you a list of Surveyed Machinery, which, as you will notice, includes the standby piston cooling water pump.

Regarding the Nos. 7 and 8 main bearings I regret to say that they, though having been examined, were inadvertently omitted, and error for which I am responsible, but, as the wear-down of the crankshaft has been checked, I suppose there will be no difficulty in convincing Lloyd's Register that mentioned bearing really have been surveyed.

Yours faithfully,

Sgd. x.x.x.x

Chief Engineer.
