ANGS

Sir,

**Lloyd's Register of Shipping,**

Powell Balfour House,

~~Levee Buildings~~ Buildings, Adelaide Street,

Swansea, 13th August, 1948.

"AVISMERE" ex "OCEAN VISION".

The above vessel is stated to be coming to the Prince of Wales Dock at Port Talbot and it is proposed to convert the bottom welded to riveted construction. It is assumed that this will be the fitting of frames to the floors and shell angles to the end and side girders. The repairers wish to know the scantlings of these items and if any modification is required to the thicknesses of the bottom plating.

A suggestion has been put forward that the keel and outer halves of "B" strakes be retained and new outside strakes fitted between keel and outer half of "A" strake and between "A" strake and inner half of "B" strake. If the Owners wish to have riveted butts between strakes it is also suggested that inside butt straps be fitted.

We have requested a plan showing the proposed modifications for submission to you however the repairers would like to have the scantlings requested above and any remarks you may have to make for your guidance in the preparation of this plan.

It is understood the Owners Representative has already consulted you on this matter.

We are, Dear Sir,  
Yours faithfully,

The Surveyors,  
Per:-

Secretary,
