Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

19th December, 1935.

Dear Sirs,

With reference to your report No.17316 on the boiler
E. No.228 made by Messrs. Richardson Westgarth Ltd., for Messrs.
Smith's Dock Co., Ltd., I have to say it is concluded the tensile
strength of the combustion chamber girder plates is 28 to 32
tons per sq. inch, as indicated on the plan, and not 26 to 30
tons as stated in the report, but I shall be glad to learn if
this is so.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

WEST HARTLEPOOL.
