

least distance between boilers or uptakes and bunkers or woodwork

1'-0"

Is oil fuel carried in the double boiler

Richardsons, Wengert & Co.

Boiler No. 228

Apr. 17/16

It is concluded the tensile strength of the combustion chamber girder plates is 28 to 32 tons per sq. inch as indicated on plan, and not 26 to 30 tons as stated in report; but this should be confirmed.
