

BOARD REPORT on the

PENTHIEVRE ex Camora

It is submitted the Nantes Surveys be informed that the payload of 716 mpm previously assigned cannot be reduced.

It is concluded therefore as suggested in the letter of 28.5.48 that the survey will accept the S.V. payload stated to be 700 mpm and that Land Line certificates will be issued by the S.V.

He should also be informed that the responsibility for the stability of the vessel is that of the master/owner.

JH 2.4.48

Surveys letter also

for Plans Dept for loading condition.

The scantlings are suitable for the distribution of loading indicated.
