Reference

The Secretary,
London.

Dear Sir,

M.V. "SLANEY" Newcastle Report No. 107095

With reference to your classing letter of the 31st March, 1950, we would advise that your remarks regarding the M.N. have been noted.

With regard to the electrical lighting voltage we would advise that the figure of 110 volts as given on Report No. 13 is correct. The battery for lighting purposes is 110 volts 95 amp. hours and this battery is shown on the Diagrammatic Arrangement Plan.

We are, Dear Sir,

Yours faithfully,
THE SURVEYORS.
