

LIVERPOOL

Gen. cable 23/11/59.

For the vessel to proceed to another port to be used as a bunkering depot ship the following should be done:-

ES to be completed as per Genoa Rpt N° 23724.

If boilers have been used during lay-up period then full MBS to be held. If not used, then boilers to be examined internally to ensure that no undue deterioration has taken place, all safety valves to be opened out, examined and adjusted under steam and oil burning arrangements examined.

Starboard screwshaft to be examined.
