6th October, 1933.

Dear Sir,

H. With reference to the modified survey of the oil engines which became due so long ago as August 1932 on the motorship "IMA" and has been partly held by the examination of all four cylinders, pistons, valves, gears and covers of the main engine, I have to acquaint you that the Owner has informed the Society's Surveyors at Oslo that this vessel is expected to arrive at Hamburg about the middle of this month, and that instructions will be given for as much as possible of the above survey to be carried out then.

In the circumstances I shall be glad if you will give the case attention in due course.

I am, Dear Sir,

A. Chisholm Esq.,

Yours faithfully,

HAMBURG.

C. G. S.

Clerk to the
Classification Committee.
