

Extract from Piraeus Classing Letter d'd 25th October, 1955.

"ATHOS". Before Piraeus Report No. 6737, furnished by Mr. Brooke-Smith, receives the consideration of the Committee I shall be glad if you will kindly ascertain and let me know whether the oil burning installation has been fitted in accordance with the approved and amended plan and whether the remaining requirements of the Rules for pumping and piping and fire extinguishing arrangements have been complied with.

The Surveyors,
PIRAEUS

25th October, 1955.

If this is the case a notation of "Fitted for oil fuel 8,55 FP above 150°F" will be assigned. A record of sps 8,55 will also be assigned in respect of the Steampipe Survey carried out at this time.

It is concluded that there is no evaporator on this ship, but your confirmation is desired. At the same time I shall be glad to learn the thicknesses of the upper deck plating, as ascertained by drilling. An early reply will be appreciated.
