Lloyd's Register of Shipping.

71, Fenchurch Street, E.C. 3.

3rd November 1922.

Dear Sir,

M With reference to Glasgow First Entry Report No. 42275 on the Steel Screw Steamer "MANOERAN", it is concluded that the size of the web frames in the upper 'tween decks is 33" to 21" x .44" as shewn on the midship section (as built), and not 31" to 21" x .44" as stated on the Report, but I shall be glad if you will confirm that this is so.

In view of the inside surface of the shell plating being covered with paint, cement and "Negrine", I shall be glad to learn whether the notation "CEM" or "PT.CEM" should be made in this case.

I am, Dear Sir,

Yours faithfully,

Assistant to the Secretary.

The Secretary,

GLASGOW.
