Rpt. 17.

No. 9023.

Report on Refrigerating Machinery and Appliances.

Inspected at London Office

17 MAR 1952

Date of writing Report 8-3-52. When handed in at Local Office 8-3-52. Port of SINGAPORE.

No. in Reg. Book. Survey held at SINGAPORE. Date: First Survey 11-7-51. Last Survey 18-2-52. 21601 (Number of Visits 9.)

on the Refrigerating Machinery and Appliances of the STEEL TWIN S.S. "M.V. ORESTES" Tons Gross 7765 Net 4737

Vessel built at BELFAST. By whom built WORKMAN, BROWN & CO. Yard No. - When built 1926.

Owners OCEAN S.S. CO. LD. Port belonging to LIVERPOOL. Voyage -

Refrigerating Machinery made by J.E. HALL LD. Machine Nos. 6448. When made 1926.

Insulation fitted by - When fitted - System of Refrigeration CARO-HUNY.

Method of cooling Cargo Chambers BRINE / BRINE AND AIR. Insulating Material used CORN

Number of Cargo Chambers insulated 8. Total refrigerated cargo capacity 134,430. cubic feet

DESCRIPTION OF REFRIGERATING MACHINERY. Where placed FORWARD END SWEET TUNNEL.

Refrigerating Units, No. of 2. No. of machines 1. As each machine independent YES.

Total refrigeration or ice-melting capacity in tons per 24 hours 48 (R.B.). Are all the units connected to all the refrigerated chambers YES.

Compressors driven direct through ^{single} reduction gearing. Compressors, single or double acting DOUBLE. If multiple effect compression YES.

Are relief valves or safety discs fitted YES. No. of cylinders to each unit ONE. Diameter of cylinders 4 1/16 INS.

Diameter of piston rod 2". Length of stroke 15". No. of revolutions per minute 90.

Motive Power supplied from 4 DIESEL ENGINE GENERATORS (PORT AFT, PORT FWD, STAR AFT, STAR FWD) (State number of boilers, oil engines or electric generators supplying the motive power.)

Steam Engines, high pressure, compound, or triple expansion, surface condensing. No. of cylinders - Diameter -

Length of stroke - Working pressure - Diameter of crank shaft journals and pins -

Breadth and thickness of crank webs - No. of sections in crank shaft - Revolutions of engines per minute -

Oil Engines, type B.W. (Semi-Induction) 2 or 4 stroke cycle 4. Single or double acting SINGLE. B.H.P. 150.

No. of cylinders 8. Diameter 3.25 INS. Length of stroke 3.00 INS. Span of bearings as per Rule -

Maximum pressure in cylinders - Diameter of crank shaft journals and pins JOURNALS 1.70 INS, PINS 1.90 INS.

Breadth and thickness of crank webs BREADTH 3.30 INS, THICKNESS 1.00 INS. No. of sections in crank shaft SEMI. Revolutions of engine per minute 300.

Air Receivers: Have they been made under survey - State No. of Report or Certificate -

Is each receiver, which can be isolated, fitted with a safety valve as per Rule YES.

Can the internal surfaces of the receivers be examined and cleaned YES. Is a drain fitted at the lowest part of each receiver YES.

No. of Receivers 2. Cubic capacity of each 1300 cu ft. Internal diameter 7'-2" thickness 1 3/16.

Seamless, lap welded or riveted longitudinal joint RIVETED. Material M.S. Range of tensile strength - Working pressure by Rules 335 LB.

Electric Motors, type OPEN - 2 PEDESTAL. No. of 2. Rated 120 BHP. Kilowatts 220. Volts

at 450/300 revolutions per minute. Diameter of motor shafts at bearings 5 1/2"

Reduction Gearing SINGLE. Pitch circle diameter, pinion 5". Main wheel 22 1/4". Width of face 13 1/2"

Distance between centres of pinion and wheel faces and the centre of the adjacent bearings, pinion 17". Main wheel 11 3/4"

Pinion shafts, diameter at bearings 3 7/8". Main wheel shaft, diameter at bearings 6"

Gas Condensers, No. of 2. Cast iron or steel casings CAST IRON. Cylindrical or rectangular CYLINDRICAL. Are safety valves fitted

to casings YES. No. of coils in each 2000 ft. 1 1/2" Material of coils COPPER. Can each coil be readily shut off or disconnected YES.

Water Circulating Pumps, No. and size of pumps available 1 @ 3 BHP. how worked ELECT MOTOR. Gas Separators, No. of 2.

Gas Evaporators, No. of 2. Cast iron or steel casings CAST IRON. Pressure or gravity type PRESSURE. If pressure type, are safety

valves fitted YES. No. of coils in each casing 2000 ft. Material of coils S.D. STEEL COPPER NPS. Can each coil be readily shut off or disconnected YES.

Direct Expansion or Brine Cooled Batteries, No. of 1. Are there two separate systems, so that one may be in use while the other is being

cleared of snow YES. No. of coils in each battery 2. Material of coils S.D. STEEL. Can each coil be readily shut off or

disconnected YES. Total cooling surface of battery coils 5915 sq. ft. Is a watertight tray fitted under each battery YES.

Air Circulating Fans, Total No. of 2 @ 8 BHP. each of - cubic feet capacity, at 525. revolutions per minute

Steam or electrically driven ELECTRICALLY. Where spare fans are supplied are these fitted in position ready for coupling up YES.

Brine Circulating Pumps, No. and size of, including the additional pump 2 @ 8 BHP. how worked ELECT MOTOR.

Brine Cooling System closed or open OPEN. Are the pipes and tanks galvanised on the inside NO.

No. of brine sections in each chamber No. 4 CENTRE CORNER (4), No. 4 T.D. CORNER (2), No. 4 T.D. SQUARE (3), No. 4 HEAD (5),

No. 5 T.D. SQUARE (5), No. 8 T.D. CORNERS (2), No. 5 HEAD (7), No. 6 T.D. CORNERS (4)

Can each section be readily shut off or disconnected YES. Are the control valves situated in an easily accessible position YES.

NOTE.—THE WORDS WHICH DO NOT APPLY SHOULD BE DELETED.

201174. (MADE AND PRINTED IN ENGLAND.)

003875-003883-0079 1/2

Are thermometers fitted to the outflow and to each return brine pipe... YES Where the tanks are closed are they ventilated as per Rule... YES
 Where the tanks are not closed is the compartment in which they are situated efficiently ventilated... YES
 Are the number and capacity of the machines and the number of pumps and sea connections in accordance with Section 2, Clause 1 of the Rules... —
 Is the exhaust steam led to the main and auxiliary condensers... —

HYDRAULIC AND OTHER TESTS.

DESCRIPTION.	Date of Test.	Working Pressure.	Hydraulic Test Pressure.	Air Test Pressure.	Stamped.	REMARKS.
Engine Cylinders (if tested)						
Gas Compressors						
„ Separators						
„ Multiple Effect Receivers						
„ Condenser Coils						
„ Evaporator Coils						
„ Condenser Headers and Connections						
„ Condenser Casings						
„ Evaporator Casings						
NH ₃ Condenser, Evaporator and Air Cooler Coils after erection in place						
Brine Piping after erection in place...						

Have important steel castings and forgings been tested in accordance with the Rules... —

Cooling Test. Has the refrigerating machinery been examined under full working conditions, and found satisfactory... YES *See Memorandum Surveyors Interim Certificate Dated 28-11-51*

Dates of test... Density of Brine... by... hydrometer

Temperatures (when the cargo chambers are cooled down to the required test temperatures) of delivery and return air at direct expansion or brine cooled batteries... &... outflow and return brine... &... atmosphere... cooling water inlet and discharge... &... gas in condensers... and evaporators... the average temperature of the refrigerated chambers... and the rise of temperature in these chambers upon the expiration of... hours time after the machinery and cooling appliances have been shut off... —

SPARE GEAR.

Are the working parts of the machines, pumps and motors respectively, interchangeable... YES

Has the spare gear required by the Rules been supplied... YES *(See Below)*

Additional Spare Gear Supplied: *Set of crosshead brasses, sets of top and bottom end bearings, set of crankshaft coupling bolts, sets (2) of packing for compressor piston rods, two compressor liners, two compressor pistons and rods, set of compressor suction and delivery valves, spare circulating pump impeller and shaft, spare brine pump impeller and shaft, spare driving gear piston shaft, assorted lengths of piping with flanges and flanges, couplings and screwing appliances, assorted valves, cocks and fittings, assorted bolts, nuts and washers, valves and springs, packing and joint rings.*

The foregoing is a correct description of the Refrigerating Machinery.

Manufacturer.

DESCRIPTION OF INSULATION.

	IN LOWER HOLD CHAMBERS.					IN TWEEN DECK CHAMBERS.

Insulated Hatches, Bilge	18 INCHES									
Insulated Hatches, Manhole	12 INCHES									
Hatchway Coamings, Main										
Hatchway Coamings, Bilge										
Hold Pillars	EFFECTUALLY INSULATED.									
Masts										
Ventilators	EMBEDDED IN INSULATION. (AFTER PAINT)									
Are insulated plugs fitted to provide easy access to bilge suction roses	<u>YES</u> tank, air, and sounding pipes <u>YES</u> heels of pillars <u>—</u>									
and manhole doors of tanks	<u>YES</u> Are insulated plugs fitted to ventilators <u>YES</u> cargo ports <u>NONE</u> and side lights <u>NONE</u>									
Is the insulation of the lower hold floor and tunnel top in way of the hatchways protected	<u>YES</u> if so, how <u>3" x 3" PERMANENT BATTENS</u>									
Oil Storage Tanks, where adjacent to the insulated chambers, state what provision has been made for ventilating the air space between the insulation and the bulkhead plating	<u>—</u>									
and for draining the tank top	<u>—</u>									
Fireproof Insulation. Is the insulation and woodwork fireproof in way of bunks or any surfaces exposed to excessive heat	<u>—</u> Where									
Cooling Pipes pass through watertight bulkheads or deck plating, are the fittings and packing of the stuffing boxes both watertight and fireproof	<u>YES</u>									
Cargo Battens, Dimensions and spacing, sides	2 1/2" x 3" (KANGAROO) floors 8" x 3" x 15" tunnel top 3" x 3" x 15"									
fixed or portable screens fitted over the brine grids at chamber sides	<u>YES</u> winged or permanently fixed <u>GRIDS</u> <i>NO. 12 315, 35; NO. 14 TO LOUVER 10, 15; NO. 14 TO SOUNDING 10, 15; NO. 14 TO 20, 25, 12</i>									
Thermometer Tubes, No. and position in each chamber	<u>NO. 12 LOUVER 10, 15; NO. 14 TO SOUNDING 10, 15; NO. 14 TO 20, 25, 12; NO. 14 TO 25, 12</u>									
diameter	3/16"									
are they fitted in accordance with Section 3, Clause 8	<u>YES</u>									
Protection of Pipes. Are all pipes, including air and sounding pipes, which pass through or into insulated chambers, well insulated	<u>YES</u>									
Drainage Arrangements. What provision is made for draining the inside of the chambers	TRAPPED SUCCTION.									
Where sluices, scupper pipes, and drain pipes are fitted are means provided for blanking them off	<u>YES</u>									
What provision is made for draining the refrigerating machinery room	RIGID BOTTOM TO TUNNEL SPACE.									
brine return room	SLOPED TO MAIN SPACE.									
fan room	SLOPED TO MAIN SPACE.									
water circulating pump room	IN TUNNEL SPACE.									
Are all air spaces behind insulation arranged to drain to the bilges, bilge wells, or gutterways of the respective chambers	<u>YES</u>									

Sounding Pipes, No. and position in each chamber situated below the load water line Rect. Pipes No 4 Head and No 5 Hold
 Diameter 3 ins. Are all sounding pipes in way of insulated chambers fitted in accordance with Section 3, Clause 11 Yes
 Are all wood linings tongued and grooved Yes Are cement facings reinforced with expanded steel lattice —
 How is the expanded metal secured in place —
 How are the cork slabs secured to the steel structure of the vessel —
 Air Trunkways in Chambers. Are the arrangements satisfactory and in accordance with the approved plans —
 Are they permanently fixed or collapsible, or portable Collapsible and Portable
 Where air trunkways pass through watertight bulkheads, are they fitted with watertight doors — Are the door frames efficiently insulated —
 Are insulated plugs supplied for the doorways — Where are the doors worked from —
 Cooling Pipes in Chambers, diameter 1 29/32" Minimum thickness 7 w.g. Are they galvanised externally No
 How are they arranged in the chambers ROOF AND SIDES
 Thawing Off, what provision is made for removing the snow from the cooling pipes in the chambers HOT BRINE

The foregoing is a correct description of the Insulation and Appliances.

Builders.

Plans. Are approved Plans or Specifications forwarded herewith for the Refrigerating Machinery — and Insulation —
 (If not, state date of approval)
 Is the Refrigerating Machinery and Appliances duplicate of a previous case Yes If so, state name of vessel "IDOMENEUS"
 If the survey is not complete, state what arrangements have been made for its completion and what remains to be done Survey complete

General Remarks (State quality of workmanship, opinions as to class, &c.) The refrigerating machinery and appliances of this vessel have been opened up and examined as required for a subsequent Special Survey and found in satisfactory condition. The materials used and the workmanship throughout are good. The refrigerating installation, in my opinion, is in good and efficient condition and is eligible to have the notation of RMC (with date) "To maintain temperature 12°F, with sea temperature 90°F maximum."

(As requested in your letter Class (H) dated 8th March, 1951, the London copy of RPE 17/12/51 is returned herewith)
