M.V. "CIS BROVIG."

A class of 100 A1 "Carrying Petroleum in Bulk" was assigned to this ship by the Glasgow Committee on the 5th October 1948, but confirmation of this Minute has been deferred pending the receipt of satisfactory Torsional particulars. It is understood that the necessary particulars will be obtained from a sister ship Yard No. 479, about the 5th May.

In order to safeguard the Owners' interest in the case, it is not considered desirable to issue a classification certificate until the Torsional characteristics are found to be satisfactory, but it is submitted that full classification particulars relating to the hull be in the meantime inserted in the re-print of the Register Book, the section of which containing this vessel's name is due for Press now.

It is considered however, that the IMC notation should not be included in the class particulars until the case is found to be quite satisfactory.
