Buffalo, N. Y.

June 23rd 1914

Mertail

F. W. Tweddell

Power Specialty Co., attend at their works at Denzville, N. Y.
on the 22nd June 1914 in order to witness the testing of

Two Foster Superheaters

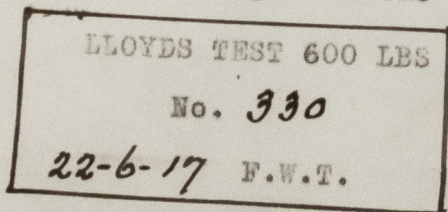

constructed by the above firm to the order of

The Petroleum Transport Co of Violet. Lou. for Hull No 23

The superheaters were subjected in the presence of the undersigned to a water pressure of 600 pounds per square inch and showed signs of weakness or leakage at that pressure.

So far as can be seen, the materials and workmanship employed in the construction of above, are sound and good.

The superheaters were stamped in the presence of the undersigned
