17 Battery Place,

New York, N. Y. 10004

July 14, 1964

Mr. Knud Moller

JACKSONVILLE

M.V. "JOAN"  
716 Gross Tons

Dear Sir:

We are in receipt of your letter dated July 9, 1964 enclosing copies of your reports regarding installation of a new steam generator which was effected at your port during April of this year.

From your report, however, it is not clear whether this boiler has been built under this Society's survey, and I should, therefore, be glad to have your advice as to the position in this respect.

If the boiler has actually been surveyed copies of the certificates and reports, etc., should be forwarded to this office or reference made to the report number and port which are applicable. On the other hand if the boiler has not been made under survey, it will be necessary for full details and plans to be forwarded to this office for approval in the normal way. Further to this it would also be necessary for a complete internal examination to be made and a hydrostatic test carried out as required by the Society's Rules, and I shall be obliged if you would make the necessary arrangements for this to be done and to issue amended certificates making these subject items for their acceptance. Also with regard to the survey date, this will depend upon the internal examination or when the boiler was constructed, in which case if the boiler has not been built under survey the recommendation should be as follows:

Machinery of this ship remain as classed with fresh record of DBS (with date) followed by N when the boiler has been examined and tested as required by the Rules and subject to any other conditions of class being dealt with as previously recommended

DF.

2.

Your reports and certificates are being returned herewith, and I shall be glad to have your amended certificates and advice at your earliest convenience.

Yours faithfully,

W. J. Roberts  
Chief Representative and  
Principal Surveyor
