Dear Sirs,

Transversely Framed Tanker "SKOTAAS".

Your ref.: Classn(S).

Referring to your letters of the 1st and 7th inst.
I beg to confirm that the four alternatives mentioned have
been passed on to the Captain who in reply telegraphs that
he calculates to be able to load a full cargo and leave
centertank No. 4 or 5 empty.

From the enclosed plan you will note that on "Skotaas"
number of tanks is counted from aft to fore, whilst you most
probably count the reverse way. As the total number of center-
tanks is 8 and you prefer No. 4 or 5 empty, it does not matter
from which side we count in this case. If it however should be
possible to leave wingtank No. 2 empty as preferred by you,
please immediately on receipt of this letter send me a short
telegram stating whether the tank Nos. given by you is based on
counting from forecastle-head or poop.

I hope to have your reply latest by the 14th inst.

Yours faithfully,
IVER BUGGE
