

E. Carey Esq.,

With reference to our conversation over the phone respecting the Engines made by Davey, Paxman & Co., and recently despatched to Montrose, I spoke to the Engine builders over the phone, and they gave me to understand that these engines are the property of the Admiralty, they are storing them for the Admiralty until they dispose of them, and they have not (the builders) received their final payment for the Engines, so it is very evident that we are unable to charge Davey, Paxman a fee.
