

14 Blythswood Square,

GLASGOW C.2.

July 25, 1949.

S.M. "SEEKONK"

The particulars and reports on the main diesel engine and essential auxiliaries of this motor tanker have been examined and found acceptable for class.

The machinery installation includes a small donkey boiler which was not surveyed and which was reported to be out of use and extensively damaged. The surveyors state that this boiler is not an essential auxiliary and have recommended that the boiler be repaired or renewed at the owners convenience.

It is submitted that the machinery of this ship excluding the donkey boiler is eligible for British Corporation class with the notation MBS.

SIGNED.
