"Certificates will be issued in respect of ships and of machinery and refrigerating installations which have been approved by the Committee for classification. These certificates automatically lapse when there is any damage to or reported defect in a ship which affects their validity, and they remain invalid until such damage or defect is made good to the satisfaction of the Committee. The continuance of the classification of any ship or of any machinery or refrigerating installation is conditional upon compliance with the Rules for surveys after construction and upon approval of any structural alterations which affect classification or assigned freeboards. The Committee reserve the right to reconsider, withhold or suspend the class of any ship or any part of the machinery or equipment for non-compliance with the Rules, for defects reported by the surveyors which have not been rectified in accordance with their recommendations, or for non-payment of fees which are due on account of classification and other surveys."
