T.S. Motor Vessel "ASHMORE"

This vessel was built by Messrs. Sir W.G. Armstrong
Whitworth & Co. (Shipbuilders) Ltd., the date of build assigned
being 1932-4mo.

A letter has been received from Messrs: Arnesen,
Christensen & Smith stating that this vessel has been bought by
Messrs. Johs. Salve Kallevig, Arendal, Norway, on whose behalf
they are acting. They point out that since her completion she
has been laid up at Messrs. Armstrong's yard and has never been
in commission. They state that they, and the Newcastle
Surveyors, have inspected her during the last few days, and that
she has been found in ^{perfect} condition ^{and the machinery} equal to new. The Owner is
anxious that the vessel might be registered as new from the date
of the trial trip, and they request that, in view of the above,
the Society will record her date of build as January 1934.

In August last a similar enquiry was received from the
Bergen Surveyor, who was requested to inform the prospective
purchasers that no alteration could be made in the date of build,
but the dates of the Periodical Special Surveys Nos. 1, 2 & 3
could be dated from the time of the general examination of the
vessel in dry dock, in accordance with Paragraph 1, page 13, of
the Rules, which provides that in cases where a vessel upon
completion is not immediately put into commission, but is laid
up for a period, upon application by the Owner, the Committee may
direct a general examination to be held in dry dock, and if the
vessel is reported to be in all respects free from deterioration,
the periodical surveys shall become due at periods of 4, 8 & 12
years from the date of such examination.

(NOTE: At that time (8,33) confirmation was obtained from the
Newcastle Surveyors that the ship had been laid up since
completion.)

It is submitted the Writers might be informed
accordingly.
