Report on Oil Engine Machinery

No. 2340

24 APR 1946

Date of writing Report 12th April 1946 When handed in at Local Office 16th April 1946 Port of Malacca
No. in Survey held at Malacca Date, First Survey 20th Nov. 1944 Last Survey 2nd April 1946
Reg. Book. empty Number of Visits 122

39705 on the Twin Screw vessel "SOYA II" Tons {Gross 10497, Net 6260

Built at Malacca By whom built Kockemms Mek. V. A. B. Yard No. 279 When built 1946
Engines made at Malacca By whom made Kockemms Mek. V. A. B. Engine No. 373 When made 1946
Donkey Boilers made at Malacca By whom made Kockemms Mek. V. A. B. Boiler No. 1003/4 When made 1946
Brake Horse Power 5500 Owners Rederi A. B. Soga Port belonging to Stockholm
Nom. Horse Power as per Rule 1556 Is Refrigerating Machinery fitted for cargo purposes No Is Electric Light fitted Yes
Trade for which vessel is intended

OIL ENGINES, &c.—Type of Engines MAN D 8 Z 60/110 2 or 4 stroke cycle 2 Single or double acting Double
Maximum pressure in cylinders 50 kg. cm² Diameter of cylinders 235/8 1100 mm No. of cylinders 8 No. of cranks 8
Mean Indicated Pressure 5.5 kg. cm² Length of stroke 1100 mm
Span of bearings, adjacent to the Crank, measured from inner edge to inner edge 860 mm Is there a bearing between each crank Yes
Revolutions per minute 120 Flywheel dia. 2093 mm Weight 4250 kgs. Means of ignition Direct ignit. Kind of fuel used Heavy oil
Crank Shaft, {Solid forged as fitted 440 mm. Semi built dia. of journals as fitted 440 mm. Crank pin dia. 440 mm. Crank Webs Mid. length breadth 720 mm Thickness parallel to axis 275 mm
Flywheel Shaft, diameter as fitted 440-385 mm. Intermediate Shafts, diameter as fitted 367 mm. Thrust Shaft, diameter at collars as fitted 385 mm
Tube Shaft, diameter as per Rule as fitted Screw Shaft, diameter as fitted 410 mm. Is the tube screw shaft fitted with a continuous liner Yes
Bronze Liners, thickness in way of bushes as fitted 20 mm. Thickness between bushes as fitted 15 mm. Is the after end of the liner made watertight in the propeller boss Yes
If the liner is in more than one length are the junctions made by fusion through the whole thickness of the liner Yes
If the liner does not fit tightly at the part between the bearings in the stern tube, is the space charged with a plastic material insoluble in water and non-corrosive Yes
If two liners are fitted, is the shaft lapped or protected between the liners Yes Is an approved Oil Gland or other appliance fitted at the after end of the tube shaft No
Propeller, dia. 5000 mm Pitch 3790 mm No. of blades 4 Material Stainless steel whether Moveable No Total Developed Surface 92 sq. feet
Method of reversing Engines Direct Is a governor or other arrangement fitted to prevent racing of the engine when declutched Yes Means of lubrication
Thickness of cylinder liners 41.5 mm Are the cylinders fitted with safety valves Yes Are the exhaust pipes and silencers water cooled or lagged with non-conducting material Lagged
Cooling Water Pumps, No. 2 each water each of 275 m³/H. Is the sea provided with an efficient strainer which can be cleared within the vessel Yes
Bilge Pumps worked from the Main Engines, No. 2 diam. 100 mm Stroke 100 mm Can one be overhauled while the other is at work Yes
Pumps connected to the Main Bilge Line No. and Size 1 of 100 m³/H, 1 of 40 m³/H, 1 of 30 m³/H, 1 of 50 m³/H. How driven One steam driven, two elec. driven, steam driven, steam driven
Is the cooling water led to the bilges led overboard If so, state what special arrangements are made to deal with this water in addition to the ordinary bilge pumping arrangements Yes

Ballast Pumps, No. and size One of 100 m³/H. Power Driven Lubricating Oil Pumps, including Spare Pump, No. and size 2 each of 44 m³/H.
Are two independent means arranged for circulating water through the Oil Cooler Yes Suctions, connected to both Main Bilge Pumps and Auxiliary Bilge Pumps, No. and size:— In Machinery Spaces 4-3 1/2" In Pump Room fwd. 1-3 1/2"
In Holds, &c. 2-3 1/2" in dry cargo hold. 2-3 1/2" in cofferdams forward.
Independent Power Pump Direct Suctions to the Engine Room Bilges, No. and size 1-5" 1-4" & 1-3 1/2"
Are all the Bilge Suction pipes in Holds and Tunnel Well fitted with strum-boxes Yes Are the Bilge Suctions in the Machinery Spaces led from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges Yes
Are all Sea Connections fitted direct on the skin of the ship Yes Are they fitted with Valves or Cocks Both
Are they fixed sufficiently high on the ship's side to be seen without lifting the platform plate Yes or by lifting special covers. Are the Overboard Discharges above or below the deep water line Above
Are they each fitted with a Discharge Valve always accessible on the plating of the vessel Yes Are the Blow Off Cocks fitted with a spigot and brass covering plate Yes
What pipes pass through the bunkers Injections pipes from after cofferdam How are they protected Yes
What pipes pass through the deep tanks Injections pipes from after cofferdam Have they been tested as per Rule Yes
Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times Yes
Is the arrangement of valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another Yes Is the Shaft Tunnel watertight No tunnel Is it fitted with a watertight door worked from Yes
If a wood vessel, what means are provided to prevent leakage of either fuel oil or of lubricating oil from saturating the woodwork Yes

Main Air Compressors, No. None No. of stages Diameters Stroke Driven by
Auxiliary Air Compressors, No. 2 No. of stages 2 Diameters 300-110 mm Stroke 220 mm Driven by Aux. oil engines
Small Auxiliary Air Compressors, No. 1 No. of stages 2 Diameters 15 m³ atm. air/H. Stroke Driven by Aux. generator, steam driven
What provision is made for first Charging the Air Receivers

Scavenging Air Pumps, No. 2 Diameters 1380 mm Stroke 1110 mm Driven by Main engine
Auxiliary Engines crank shafts, diameter as per Rule 152 mm as fitted 170 mm No. 2 Position 20 R.
Have the Auxiliary Engines been constructed under special survey Yes Is a report sent here with Yes

Lloyd's Register Foundation

004135-004144-0139 1/2

AIR RECEIVERS:—Have they been made under survey... *Yes* ✓ State No. of Report or Certificate... *✓*
 Is each receiver, which can be isolated, fitted with a safety valve as per Rule... *Yes* ✓
 Can the internal surfaces of the receivers be examined and cleaned... *Yes* ✓ Is a drain fitted at the lowest part of each receiver... *Yes* ✓
 Injection Air Receivers, No. *1* Cubic capacity of each... *200 litres* Internal diameter... *416 mm* thickness... *12 mm*
 Seamless, lap welded or riveted longitudinal joint... *Seamless* Material... *Steel* Range of tensile strength... *50-51.6 kg. mm²* Working pressure... *50 kg. cm²*
 Starting Air Receivers, No. *2* Total cubic capacity... *12 m³* Internal diameter... *1450 mm* thickness... *25 mm*
 Seamless, lap welded or riveted longitudinal joint... *Riveted* Material... *Steel* Range of tensile strength... *44.5-49.4* Working pressure... *21.2 kg. cm²*
 IS A DONKEY BOILER FITTED? *Yes* ✓ If so, is a report now forwarded? *Yes* ✓
 Is the donkey boiler intended to be used for domestic purposes only... *No* ✓
 PLANS. Are approved plans forwarded herewith for Shafting... *10.9.1943* Receivers... *10.9.1943* Separate Fuel Tanks... *14.7.1944*
 Donkey Boilers... *10.9.1943* General Pumping Arrangements... *14.7.1944* Pumping Arrangements in Machinery Space... *14.7.1944*
 Oil Fuel Burning Arrangements... *✓*

SPARE GEAR.

Has the spare gear required by the Rules been supplied... *Yes* ✓
 State the principal additional spare gear supplied: *1 top & 1 bottom cylinder cover. 1 complete piston with piston rod. 1 connecting rod. 4 complete piston rod packing boxes. 1 complete fuel pump. 4 top & 8 bottom fuel nozzles. 9 sets of piston rings. 1 propeller shaft.*

The foregoing is a correct description of...
 Manufacturer: *Hestoverleedy*

Dates of Survey while building... *From 20th Nov. 1944 to 14th Jan. 1946.*
 Dates of Examination of principal parts...
 Crank shaft... *25/12.1944* Flywheel shaft... *23/12.1944* Thrust shaft... *17/12.1945* Intermediate shafts... *17/12.1945* Tube shaft... *19/1.1946*
 Screw shaft... *12.1945* Propeller... *17/12.1945* Stern tube... *1/10.1945* Engine seatings... *4/12.1945* Engines holding down bolts... *30/3.1946*
 Completion of fitting sea connections... *4/12.1945* Completion of pumping arrangements... *29/3.1946* Engines tried under working conditions... *30/3.1946*
 Crank shaft, Material... *Steel* Identification Mark... *NV 11671 25.4.44* Flywheel shaft, Material... *Steel* Identification Mark... *424.P.B.25.12.44*
 Thrust shaft, Material... *Steel* Identification Mark... *445.P.B.19.45* Intermediate shafts, Material... *Steel* Identification Mark... *2554.P.B.17.12.45*
 Screw shaft, Material... *Steel* Identification Mark... *567.H.L.2.2.45* Identification Mark... *568.H.L.2.2.45*
 Identification Marks on Air Receivers... *Long do 50 kg. cm² W.P. 30 kg. cm² P.B. 8.11.1945.*

Is the flash point of the oil to be used over 150° F... *Yes* ✓
 Have the requirements of the Rules for oil fuel pipes and tank fittings been complied with... *Yes* ✓
 Is the vessel (not being an oil tanker) fitted for carrying oil as cargo... *Seamless* ✓ If so, have the requirements of the Rules been complied with... *Yes* ✓
 If the notation for Ice Strengthening is desired, state whether the requirements in this respect have been complied with... *✓*
 Is this machinery duplicate of a previous case... *Yes* ✓ If so, state name of vessel... *M/T "Salutarborus", Rpt. No. 2026.*

GENERAL REMARKS (State quality of workmanship, opinions as to class, &c.)
*The main & aux. engines of this vessel has been built under special survey in accordance with the Rules and approved plans. The material fulfil the Rules requirements and the workmanship is good. The shafts as per forging reports enclosed.
 The machinery of this vessel is eligible, in our opinion, to be classed in the Reg. Book of this Society with records of L.M.C. 4.46, subject to gashight fitting in frame deck being replaced by flame proof fittings before the end of 1946, also subject to "docht" training in alternator being rid. after one year's service. W.P. of D. boilers 171 kg/cm².
 The crank shaft is made by Messrs. Skodamirke Polany and tested by Int. Novak Veritas 25.4.44 and checked tested by the Admiralty method at Maharré with satisfactory results.
 The piston rods and material for starting air receivers made by Messrs. Withorn Pargham & Co. with satisfactory results. The piston rods tested by L.L. 4.2.22.12.43 and checked tested by the Admiralty method at Maharré with satisfactory results. The material for start air receivers tested by Schiffmann & Co. 3.24.1944 H. Jung & checked tested at Maharré with satisfactory results. The propeller is made in Norway & tested by L.L. 8.45. Remaining shaft and parts are made in Sweden.*

The amount of Entry Fee... *114:-* When applied for... *16-4-1946*
 Special... *2639:-*
 When received... *120:-*
 40:-

COMMITTEE'S MINUTE... *FRI, 31 MAY 1946*
 ASSIGNED... *+ LMC 4.46 (oil Eng. Subject.)*
C.L. 2.D.B. 1716.

Certificate (if required) to be sent to: Survey Office, Maharré

M/T "SOYA II", No. 39705 in the Reg. Book Supplement.

Additional pumps:-

- In motor space:-
- 1 auxiliary pump of 20 m³/H. Electric driven.
 - 2 " " " " " " " "
 - 1 oil transfer pump 20 " " " "
 - 1 " " " 20 " Steam " "
 - 1 fire pump 80 " " " "
 - 1 cool. water pump for motor of 3 m³/H. Electric driven.
 - 2 units of oil fuel pumps for D. boilers.
 - 2 fuel pumps. Simplex 200 x 150 x 375 for D. boilers.
- In main pump room:-
- 2 cargo pumps. Duplex 20" x 14" x 24".
- In forward pump room:-
- 1 oil transfer pump of 50 m³/H. Steam driven.
