

REPORT ON OIL ENGINE ELECTRIC GENERATOR SETS.

No. 84

Received at London Office 12 NOV 1951

of writing Report 2nd Nov. 1951 When handed in at Local Office 1951 Port of Augsburg

Survey held at Augsburg Date, First Survey 23rd July, 51. Last Survey 19th Oct. 1951

Book. M.V. 'GRONLAND' Number of Visits 23

Single on the Twin Triple Quadruple Screw vessel Tons Gross Net

Hamburg By whom built Deutsche Werft A.G. Yard No. 635 When built 1951

Det Dansk - Franske Dampskib selskab Port belonging to Copenhagen

Engines made at Augsburg By whom made Maschinenfabrik Augsburg-Nürnberg A.G. of Augsburg Eng. No. 430 725/ Contract No. 26/27 When made 1951

Generators made at By whom made Contract No. When made

of Sets 3 Engine Brake Horse Power 3 x 195 M.N. as per Rule Total Capacity of Generators Kilowatts.

Set intended for essential services

3 x M.A.N. Standard Type Type of Engines G 5 V 33 A. 2 or 4 stroke cycle 4 Single or double acting single

Maximum pressure in cylinders 51/52 atm. Diameter of cylinders 220 mm Length of stroke 330 mm No. of cylinders 5 No. of cranks 5

Indicated pressure 7.22 kg/cm² Firing order in cylinders 1-3-5-4-2 Span of bearings, adjacent to the Crank, measured from inner edge to inner edge 260 mm

There a bearing between each crank yes Moment of inertia of flywheel (16 m² or Kg.-cm.²) 790 kg/m² Revolutions per minute 500

Wheel dia. 1200 mm Weight 778 Kgs. Means of ignition dir. inj. Kind of fuel used gas oil

Crank Shaft, dia. of journals as per Rule 130 mm Crank pin dia. 130 mm Crank Webs Mid. length breadth 61 mm Thickness parallel to axis

Wheel Shaft, diameter as per Rule Intermediate Shafts, diameter as per Rule General armature, moment of inertia (16 m² or Kg.-cm.²)

Means provided to prevent racing of the engine when declutched yes Means of lubrication forced Kind of damper if fitted

Are the cylinders fitted with safety valves yes Are the exhaust pipes and silencers water cooled or lagged with non-conducting material water cooled

Boiling Water Pumps, No. Is the sea suction provided with an efficient strainer which can be cleared within the vessel

Lubricating Oil Pumps, No. and size 1 x 3.34 m³/h each

Compressors, No. No. of stages Diameters Stroke Driven by

Exhausting Air Pumps, No. Diameter Stroke Driven by

AIR RECEIVERS: Have they been made under Survey State No. of Report or Certificate

Each receiver, which can be isolated, fitted with a safety valve as per Rule

Are the internal surfaces of the receivers be examined What means are provided for cleaning their inner surfaces

Is there a drain arrangement fitted at the lowest part of each receiver

High Pressure Air Receivers, No. Cubic capacity of each Internal diameter thickness

Unless, lap welded or riveted longitudinal joint Material Range of tensile strength Working pressure by Rules

Low Pressure Air Receivers, No. Total cubic capacity Internal diameter thickness

Unless, lap welded or riveted longitudinal joint Material Range of tensile strength Working pressure by Rules

ELECTRIC GENERATORS: Type Full Load Current Amperes Direct or Alternating Current

Is the system an alternating current system, state the periodicity Has the Automatic Governor been tested and found as per Rule when full load is suddenly thrown

and off Generators, are they compounded as per Rule is an adjustable regulating resistance fitted in series with each shunt field

Are all terminals accessible, clearly marked, and furnished with sockets Are they so spaced

Are the generators shielded that they cannot be accidentally earthed, short circuited, or touched Are the lubricating arrangements of the generators as per Rule

Do the generators under 100 kw. full load rating, have the makers supplied certificates of test and do the results comply with the requirements

Do the generators 100 kw. or over have they been built and tested under survey

Are there any shafts of driven machinery other than generator

CRANKSHAFTS: Are approved plans forwarded herewith for Shafting 28.9.1948 Receivers Separate Tanks

Have Torsional Vibration characteristics if applicable been approved First calculation on 12.3.51 Armature shaft Drawing No.

PREPARED GEAR 4 cylinder covers, 4 cylinder liners, 3 pistons, 3 connecting rods, 11 fuel oil pressure

pipes, 8 safety valves, 2 Bosch pumps, 17 fuel oil valves, 1 set of wheels for driving

crankshaft, 10 bolts of different sizes.

The foregoing is a correct description, Maschinenfabrik Augsburg-Nürnberg A.G. Manufacturer.

Is this machinery duplicate of a previous case - - If so, state name of vessel M.A.N. Standard Type of auxiliary engine

GENERAL REMARKS (State quality of workmanship, opinions as to class, &c.)

These heavy oil auxiliary engines have been constructed under special survey in accordance with the approved plans and instructions thereto. The material used in the construction is good and the workmanship to be satisfactory.

On Makers test bed, these heavy oil auxiliary engines have been tested running under full-, over- and partial loads with satisfactory results.

In my opinion, the vessel for which these heavy oil auxiliary engines are intended will be eligible for the notation of **L.M.C** (with date) when the whole machinery has been satisfactorily fitted aboard and tried under full working conditions.
