Independent Power Pump Direct Suctions to the Engine Room Bilges, No. and size 1 @ 8" (Ballast Pump), 1 @ 5".

Are all the Bilge Suction pipes in Holds and Tunnel Well fitted with strum-boxes placed above the level of the working floor, with straight tail pipes to the bilges Yes.

Are the Bilge Suctions in the Machinery Spaces ed from easily accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges Yes.

Are all Sea Connections fitted direct on the skin of the ship Yes. Are they fitted with Valves or Cocks Both

Are they fixed sufficiently high on the ship's side to be seen without lifting the platform plate Yes. Are the Overboard Discharges above or below the deep water line Below:

Are they each fitted with a Discharge Valve always accessible on the plating of the vessel Yes. Are the Blow Off Cocks fitted with a spigot and brass covering plate Yes.

What pipes pass through the bunkers None. How are they protected ✓

What pipes pass through the deep tanks For Bilge Suctions Have they been tested as per rule Yes.

Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times Yes.

Is the arrangement of valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one

compartment to another Yes. Is the Shaft Tunnel watertight Yes. Is it fitted with a watertight door intact worked from

If a wood vessel, what means are provided to prevent leakage of either fuel oil or of lubricating oil from saturating the woodwork ✓

Is the flash point of the oil to be used over 150° F.

Have the requirements of the Rules for oil fuel pipes and tank fittings been complied with

J. S. 1/2" dia W.I. perforated pipe for steam led around E.R. & Br. rooms 8-2 gal. Phenomenal Container.

Description of fire extinguishing apparatus fitted

Is the vessel (not being an oil tanker) fitted for carrying oil as cargo

If so, have the requirements of the Rules been complied with

not desired.

If the notation for Ice Strengthening is desired, state whether the requirements in this respect have been complied with

J. S. If so, state name of vessel M/S "EMPIRE DAWN" etc.

Is this machinery duplicate of a previous case

This machinery has been built under Spec.

General Remarks (State quality of workmanship, opinions as to class, etc.)

Survey in accordance with the approved plans & the rules of the Society. The materials & workmanship are good. It has been securely fitted on board the vessel & tried under working conditions alongside quay with satisfactory result.

The two donkey boilers have also been securely fixed on board, fitted burnt oil fuel (F.P. above 150°F). Section 20 of the rules has been complied with, Safety valves adjusted to working pressure in accordance with rule requirements.

The machinery is eligible in my opinion to have rotation 088 L MC. 6. 41 (oil eng.), T.S. (cc), 2 DB 1200 ft. lbs.
