

BOARD REPORT on the

S.S. "Louisiana"

This Submitted the Odo Surveyors be informed that it is observed from their report No 3076 dated 27.7.27 that a freeboard of 8'-9" is now marked on the vessel's sides, instead of 2'-3½" as given in the R.S.B.

It is concluded the tonnage opening has been permanently closed, that the freeing ports and overboard scuppers from shelter tween decks have been closed with riveted plates, and that new scuppers have been led to the bilges. The Surveyors should report fully regarding these matters and should also forward Rpt. 12 giving full particulars of the amended freeboard markings.
