25th October, 1957.

Your Reference: N.S. Fuel 2838/57/3A.

Dear Sir,

Steamer "WAVE CONQUEROR"

A report of survey carried out during last month has been received from the Society's Surveyor at Curacao, from which it is noted that the Main Engine gear wheel and pinions were specially examined as previously recommended. These items were found to be satisfactory, but it is recommended that the Main Engine gear wheel and pinions be re-examined or renewed before the end of March next year, and meanwhile the Main Engine should not be operated in excess of 75 RPM.

The vessel's class has been continued subject to this matter receiving attention by that time, and I shall be glad if you will arrange accordingly.

Yours faithfully,

Assistant Clerk to the  
Classification Committee.

The Director of Stores,  
Naval Store Department,  
The Admiralty,  
Whitehall,  
LONDON, S.W.1.
