

Survey Donors  
Report No. 1816

"MARIANNE B"

The question of delay in completion of the survey of this ship has been discussed with Mr. Walburn, and during the conversation attention was drawn <sup>by him</sup> to the Surveyor's report on the machinery which has yet to be received.

It appears that the machinery survey has been completed but owing to lack of time certain repairs have been left over and have been made the subject of limits by the Hamburg Surveyors.

Mr. Walburn regrets that his attention was not drawn to this case before and he has pointed out to the Surveyor that he was not in order in leaving the repairs over without authority from this Office. I promised Mr. Walburn that ~~we~~ would look into the case carefully on receipt of the report.
