

29th June, 1949.

Dear Sirs,

H.

I beg to acquaint you that in March last the Society's Surveyors at Newcastle-on-Tyne reported that repairs had been carried out to the HP cylinder of the Steamer "LORD GLADSTONE" and they recommended that this part should be further examined before the end of June and renewed by September 1949.

The Owners state that they understand the cylinder in question has recently been submitted to examination at Saigon and it is concluded that a survey has been carried out by a Surveyor appointed by your goodselves. In the circumstances his report on the case is awaited in due course.

Yours faithfully,

Clerk to the
Classification Committee.

Messrs. Denis Frères d'Indochine, S.A.,
Lloyd's Agents,
4, Rue Catinat,
SAIGON.
