

Steam Trawlers "ABY",  
"BULBY",  
"NAVENA"

Cook, Welton & Gemmell Ltd's Yard Nos. 755/6/7.

These Reports have been in abeyance pending the receipt of plans of the electrical installation and there appears to be some difficulty in obtaining these from the Electrical Contractors. The Reports have been examined and the installation is a simple 6 kW, 110 volt one, reported by the Electrical Engineer Surveyor at Hull to have been carried out in accordance with the requirements of the Rules.

In the circumstances it is considered these installations might be classed pending receipt of the plans.

IT IS ACCORDINGLY SUBMITTED that the electrical installation merits the favourable consideration of the Committee.

IT IS FURTHER SUBMITTED the attention of the Hull Surveyors be drawn to this unsatisfactory state of affairs and that they be asked for an explanation as to why these plans were not obtained and forwarded at the time of commencement of the work as is normally the practice and is required by the Rules.
