MA/BN

Dear Sirs,

## S.S. "SHAUKIWAN"

A Report of a survey carried out by the Society's Kobe Surveyors at Osaka during the period August/October 1964 has received the consideration of the Committee, and records of Docking Survey 10.64 and Screwshaft Survey 9.64 have been assigned.

At this time the steam cylinder of the general service pump was again examined and found to remain efficient in the meantime but it was recommended that this steam cylinder be again examined before the end of October 1965 and class has now been continued subject to this matter receiving attention by the time stated.

In order to complete the Main Boiler Survey, the centre and starboard boiler safety valves require to be adjusted and the oil burning system and remote controls examined. In view of the fact that this survey became due as long ago as August 1964, I shall be glad to learn what early arrangements you propose to make to deal with this matter.

Yours faithfully,

c.c. Hong Kong

pro Clerk to the  
Classification Committee.
