

Steamer "ADELPHOS PETRAKIS".

Mr. Yallouros has telephoned on behalf of the Owners of this ship concerning the Interim Certificate issued at Port Said on the 13th October, in which it is recommended that the main sea water circulating pump casing should be renewed on the ship's arrival at Japan.

He states that it is unlikely that the opportunity will present itself to have this work done in Japan, and requests that the matter should be left in abeyance until the ship returns to the Continent about February 1967.

Mr. Yallouros points out that the pump is operating satisfactorily and that in August last, the Surveyors were prepared to allow the renewal of the unit to be deferred until the occasion of the next drydocking.
